## Hikvision Free-Standing Temperature Screening Camera Kit

**£3,499**

+VAT  
**DELIVERY INCLUDED**  
(MAINLAND UK  
ADDRESSES ONLY)

**A complete solution; ready to connect to a PC or laptop and is optimised for measuring skin-surface temperatures in just 1 second; to an accuracy of  $\pm 0.5^{\circ}\text{C}$ ; providing an effective method of screening individuals and identifying those with elevated body temperatures, rapidly and without physical contact.**

This temperature screening kit allows the operator to work remotely from the camera's location and monitor thermal readings and footage in real-time.

The Bullet-Style Thermal Camera is able to take temperature measurements from up to 15m away - perfect for retaining social distancing guidelines - and can automatically alert the operator if an individual with elevated body temperature is detected via email and SD recording as well activating a relay output (which can control items such as electronic door locks).

The camera's IP66 rating means it can withstand challenging environments and the included tripod and adaptor plate enables it to be sited in a variety of locations, rapidly assembled, moved and dismantled easily.

This Temperature Screening Kit **MUST NOT** be considered a diagnostic test or instrument. However, when used to give an indication of a person's body temperature, it can be an effective tool in helping to reduce the potential spread of infection and to evidence that temperature screening checks have been carried out to ensure a reduced risk to staff and visitors

Due to the wide range of functions built-in to this kit, it can be repurposed and reconfigured for other general security/CCTV uses as required, making this one of the most adaptable kits available.

### Features

- One second to detect skin-surface temperature
- Take measurements from up to 15m away
- Simultaneous multi-person detection and measurement
- Non-contact temperature measurement system
- Immediate notification alarms
- AI detection to reduce false alarms
- 2688x1520, 4MP optical resolution
- Infrared-imaging & visual-light-imaging
- Optimised for measuring skin temperature
- Suitable for use in busy, indoor environments
- Suitable for preliminary body-temperature-measurement/fever-screening in public places
- Temperature range:  $30^{\circ}\text{C}$  to  $45^{\circ}\text{C}$
- Accuracy:  $\pm 0.5^{\circ}\text{C}$
- High-performance sensor
- IR resolution: 160 x 120px
- Audio Alarm function
- 3D DNR Image Detail Enhancement function
- VIP port prioritises data transmission on congested networks
- Supports Ethernet PoE power supply & extend mode
- Versatile security management software
- Camera dimensions: 358.3mm x 113.5mm x 115.2mm
- Camera weight: 1.76kg

### Kit contains

- High-quality bullet-style thermal imaging camera
- POE Switch
- UN  $\frac{1}{4}$ "-20 Tripod
- Tripod Adaptor Plate
- Client Software
- POE Cable
